-DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20 and 29-32, drawn to the apparatus having a source for incident radiation and a fiber optic bundle, classified in class 378, subclass 98.8.
 - II. Claims 21-25 and 26-28, drawn to the apparatus having a sensor and a fiber optic bundle and drawn to a scintillator, classified in class 250, subclass 370.11.
 - III. Claims 33-35, drawn to the method of converting a visible light image into an electronic image, classified in class 250, subclass 362.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions in Groups I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, an optical device containing lens can be utilized in the process of compressing visible light into an electronic image.
- 3. Inventions in Group I and in Group II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the invention from

Application/Control Number: 09/924,718 Page 3
Art Unit: 2882

Group I utilized x-rays as a radiation source in the disclosed apparatus, whereby the invention from Groups II utilized radiant energy in the disclosed apparatus.

- Inventions in Groups II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, an optical device-containing lens can be utilized in the process of compressing visible light into an electronic image.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.
- 7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 8. A telephone call was made to Daniel Fisher on 3 February 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. The examiner attempted to contact Mr. Fisher but was informed that was he was not listed on the employees' directory.

Application/Control Number: 09/924,718

Art Unit: 2882

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Page 4

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Therese Barber whose telephone number is (703) 306-0205. The examiner can normally be reached on Monday to Friday from 8:30 a.m. to 6:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (703) 305-3492. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 746-4857 for regular communications and (703) 308-7722 for After Final communications.
